German Peace Delegation
Complains to the

NOTE PRESENTED ON
ECONOMIC SITUATION

Germany, Note Says, Is No
Longer an Agrarian
State

Berlin, Wednesday, May 14 (By the Associated Press).—Count Von Brockdorff-Rantzau, head of the German peace mission at Versailles, handed to M. Clemenceau, president of the peace conference, yesterday, three notes, one of which deals with the economic aspects of the peace terms and the effect they will have on Germany. This note says Germany is no longer an agrarian state and cannot feed more than 40,000,000 people.

The economic terms of the peace treaty, with their restrictions of trade and other factors which are involved, means, the note says, "that many millions of people in Germany will perish, all the more quickly as the nation's health is already broken by the blockade."

The note points out that Germany in two generations has passed from an agrarian to an industrial state. As an agrarian state, it could feed 40,000,000 persons, and as an industrial country it was able to provide food for 67,000,000, the note declared. Before the war, it is said, 15,000,000 Germans were dependent for the living upon foreign trade, shipping and foreign raw materials. The note proceeds to indicate in detail how the peace conditions would produce economic paralysis, destroy German industry and make it impossible to provide work and food for millions of people, who would be obliged to emigrate or perish.

RED BLOODED PEOPLE LIVE THE LONGEST

Red blooded people retain their youth and vigor until late in life because red blood ages slowly.

A child with impure blood seems old, while an old man with pure red ironized blood seems young.

Impure blood clogs the system with waste matters, rapidly ageing body, mind and spirit.

Pure blood is red blood, rich in iron and phosphates with power to rid itself of waste matter and able to carry life-giving oxygen to every cell and nerve. It makes both young and old bright, happy, keen, and interested in life. This is the blood you need, every day of your life, the rich red blood made by pure food, fresh air, restful sleep and "Phosphated Iron" from the red blood and nerve builder.

Phosphated Iron enriches your blood and nerves, putting them in shape for work. Improves your color, increases your appetite and gives you strength, vigor and power to enjoy both work and pleasure, makes you feel like doing things once more.
